Super Edit Software Release Notes

VPE-V8.7BR / DPE-V2.1BR

SE- V8.7BR / DPE-V2.1BR   Date: Dec. 18, 2000

Changes made to Super Edit, Super Edit NT & Super Edit NLE since Version 8.7A–2.1A Releases:

ALL = VPE & DPE   **VPE** = VPE only   **DPE** = DPE only   **NLE** = NLE only   **409NT** = 409NT only

1. **ALL – DCT** - Made improvements in the control of NTSC DCT machines to prevent aborts when used as a recorder.

2. **ALL – FOR.A VPS-300** - A interface to the VPS-300 is now available.

3. **ALL – Synchronization** - Corrected a problem causing some devices to synchronize improperly.

4. **ALL – ESAM 2** - Fixed a problem that caused the loss of ESAM mixer transitions when selecting VSWR OFF and if the edit was an A/V edit.

5. **DPE – K6 keyboard** - Bump out of **[ALT] [RECORD]** has been fixed for the K6 keyboard.

6. **DPE – K6 keyboard** - Corrected a keyboard-mapping problem with the colon/semi-colon and apostrophe/quote keys on the K6 keyboard.

7. **DPE – J6 jogger** - The J6 jogger now shuttles at speeds appropriate for most machines.

8. **409NT / NLE** - Fixed certain cases of conflict between Auto 409NT and automatic operations in NLE mode such as Alt/Record and Alt/Delete.
